IT Security Training

Cybersecurity for Superheroes: How to protect yourself and your business from hackers

Why?

Most security incidents are caused by human error. Thanks to IT security training for your end users, you pick up every single employee at their level and enable them to move safely in the digital world. Employees can apply the content of the training not only in business, but also in the private environment. This doubly strengthens awareness and makes the training even more meaningful.

What?

Our IT security training equips end users with basic knowledge, dos & don'ts, and ground rules of digital security. The content is presented in a user-friendly way that is appropriate for the target audience. An interactive quiz and personal cheat sheets support learning, memorization and quick recall of the knowledge.

How?

Costs
1'500 CHF fixed price
