KIBAG

«With to the digital workplace, KIBAG has now a solid foundation for future digitization projects. Thanks to isolutions support in communication and training measures as well as governance topics, we are able to prepare our employees optimally for the further steps into the digital future.»

Yves Stucki, Head of IT KIBAG

KIBAG is a leading Swiss company in the construction materials and construction sector. Founded in 1926, the company today employs around 2'000 people and owns 14 gravel plants, 3 quarries and 25 concrete plants and 17 construction companies in the road building and civil engineering sectors. Several recycling and disposal companies as well as service providers in the leisure sector complete the picture.

The cloud migration enables KIBAG to introduce a digital workplace and a modern collaboration platform to improve collaboration internally and with external parties.

Initial situation

For KIBAG it was time to replace the existing document repository based on SharePoint On-Premise 2013 with a modern cloud application to meet the requirements of the rapidly advancing digitalization of the construction industry. With the cloud migration and the introduction of the digital

workplace, a state-of-the-art collaboration platform for teamwork and project management was created based on Microsoft Teams and SharePoint.

Solution

The introduction of the cloud-based document repository and the planning of the technical data migration was coordinated by an experienced project manager from KIBAG and the isolutions team in order to carry out its migration in a timely and secure manner. Change management was also an integral and essential part of the project. isolutions supported the development and implementation of targeted communication

and training measures to familiarize the more than 1'200 users in dealing with the new digital working environment. Only with targeted trainings the individually solutions for Microsoft Teams, SharePoint and Azure functions – for connecting peripheral systems – can be used profitably by employees.

Benefits

- The customized training concept took into account the needs of users – regardless of the work area – and the interaction between these user groups.
- The trained use cases were taken from everyday life and thus ensured a high recognition value and acceptance.
- Content and filing were identified and processed along the target groups.
- Stakeholders can be addressed individually at all hierarchical levels and corporate divisions.
- Supporting the hybrid way of working.
- Secure access to current data at any time.

Partner profile

#weshapethefuture

Founded in the civil defense cellar by three visionaries from the Bernese Oberland, isolutions has been accompanying companies into the digital future since 1999 as the largest dedicated Microsoft one-stop-shop in Switzerland. We integrate Microsoft services in a way, that adds value and has a positive change in the corporate culture.

Supported by over 200 passionate minds consisting of business and technical consultants, change makers as well as software developers, architects and cloud natives, we are driven to peak performance by our customers and their challenges. Together with customers from different industries, we build the bridge to the tech giant Microsoft. All with one goal: To create the best employee and customer experience in order to achieve competitive advantages.

Customers love our inspiring corporate culture, which is contagious. It successfully supports and overcomes organizational or technological challenges. Together with them, we shape the future of teams, products, companies and entire industries.
