Innosuisse

«Thanks to the collaboration with isolutions, we were able to achieve our goals and today we have a scalable modern digital platform.»

Markus Geiser, Head of IT

Innosuisse is the Swiss agency for innovation promotion. Innosuisse mission is to promote science-based innovation in the interest of business and society. Innosuisse specifically promotes cooperation between science and the market with innovation projects, networking, training and coaching. The goal is the successful development of Swiss start-ups, products and services.

für Innovationsförderung**

To foce the digitalization, the individual solution «Innolink» needs to be expanded to a platform in order to build a scalable, cloud-based and modern digital solution.

Initial situation

As part of the digitization, the «Innolink» individual solution needs to be expanded into a platform. An end-of-life has been announced for the SAP R/3 base technology. As a result, the existing system landscape is to be replaced by a new technology by the end of 2023. At present, the specialist application Analytics is integrated together with Innosuisse's ERP system in an SAP stack.

This creates complex dependencies in release planning as well as in the integration of new features. For this reason, it was defined that Analytics would be detached from the existing SAP ERP system and that the specialist application would be migrated step by step to a future-oriented technology.

Solution

isolutions, as one of the main partners of Innosuisse, advised the agency strongly in the various Azure Cloud services and provided technical and cultural support. The focus was on application operation and monitoring of the Innosuisse IT platform with various individual web applications, SQL reporting solutions and standard services such as CRM. A concept of new Azure services was also developed and implemented. Innosuisse also felt the need to expand collaboration and backoffice functions with standard Microsoft components.

This enables the agency to accompany and support its customers from the idea for a start-up to internationalization. The reporting needs of Innosuisse are diverse and range from simple number aggregations to complex financial reports and individual ad-hoc reporting.

Benefits

- Time savings when collecting key figures – both for external and internal inquiries.

- Future-oriented technological basis for new requirements of digitalization.

- Reduction of manual testing effort through test automation when introducing new features.

- Modern technology deployment thanks to operation in the Microsoft Azure Cloud and cloudnative applications.

Partner profile

#weshapethefuture

Founded in the civil defense cellar by three visionaries from the Bernese Oberland, isolutions has been accompanying companies into the digital future since 1999 as the largest dedicated Microsoft one-stop-shop in Switzerland. We integrate Microsoft services in a way, that adds value and has a positive change in the corporate culture.

Supported by over 200 passionate minds consisting of business and technical consultants, change makers as well as software developers, architects and cloud natives, we are driven to peak performance by our customers and their challenges. Together with customers from different industries, we build the bridge to the tech giant Microsoft. All with one goal: To create the best employee and customer experience in order to achieve competitive advantages.

Customers love our inspiring corporate culture, which is contagious. It successfully supports and overcomes organizational or technological challenges. Together with them, we shape the future of teams, products, companies and entire industries.
