Gartenmann Engineering

«Thanks to the IT transformation with isolutions into the cloud, we can work even more agile and location independent. This means that we are closer to our customers and our employees enjoy greater flexibility.»

Stefan Berner, CEO

As a leading engineering company, Gartenmann Engineering accompanies and advises its customers on all construction projects in a future-oriented and holistic manner. The engineering office is active in the fields of acoustics, building physics, energy, sustainability and fire protection. People are at the center of the consulting – and innovation and performance are based on this. All concepts and works are designed for the future and created for generations with foresight, passion and heart. Gartenmann Engineering has been represented throughout Switzerland since 1971.

Gartenmann Engineering was faced with the challenge of building a new IT infrastructure to increase productivity and efficiency. Following the successful cloud transformation and change management support, isolutions is also Gartenmann Engineering's one-stop IT partner for operations and support with its «Workplace as a Service» and «Azure Operations as a Service» offerings.

Initial situation

Due to the separation of Gartenmann Engineering from Gartenmann Holding, Gartenmann Engineering was confronted with the challenge of setting up its own new IT infrastructure for operations. The new IT infrastructure had to be modern, promote a modern way of work, focus on employees and their productivity, and contribute to an overall increase in efficiency through service and process automation. Gartenmann Engineering decided to look for a partner who could handle change management projects with a wealth of experience

in the area of Microsoft Cloud technologies. In addition, the preferred partner should also be able to offer 1st to 3rd level support. As the largest dedicated Microsoft one-stop-shop, isolutions scored well in all respects and won the contract for the partnership.

Solution

As part of the implementation, isolutions built a completely cloud-based infrastructure for Gartenmann Engineering, based on Microsoft Cloud services. With the modern workplace, employees were equipped with Microsoft Teams, which they can use to communicate with each other contextually, make phone calls to landlines and access documents stored in SharePoint. Communication via e-mail is handled by Exchange Online and the management of all end devices and applications are updated automatically via Intune. Thanks to ahead Intranet, employees have a central entry point and can find out about the company's most important news as well as content about the entire Microsoft 365 cloud environment. During this transformation, the employees were supported by change management specialists from isolutions, which contributed significantly to user acceptance.

Gartenmann obtains databases and virtual servers flexibly from Microsoft Azure and can respond to peak loads by scaling services up or down as needed – all without any additional investment costs. Thanks to «Workplace as a Service» and «Azure Operations as a Service» from isolutions, Gartenmann Engineering also has a reliable partner at hand for operation and support. Furthermore, the introduction of the Power Platform has increased productivity and efficiency by automating repetitive processes and digitizing various business processes.

Benefits

- Independent IT with innovation potential for Gartenmann Engineering.
- Increased business productivity due to location-independent and modern collaboration, efficiency gains through scalable IT services and process automation.
- Cost savings through consolidation of the IT landscape (replacement of 3rd party software).
- Reduced IT management effort thanks to managed cloud services from isolutions.
- Enhanced security thanks to protection from the Cyber Defence Center and «best practice» security configurations from isolutions.

Partner profile

#weshapethefuture

Founded in the civil defense cellar by three visionaries from the Bernese Oberland, isolutions has been accompanying companies into the digital future since 1999 as the largest dedicated Microsoft one-stop-shop in Switzerland. We integrate Microsoft services in a way, that adds value and has a positive change in the corporate culture.

Supported by over 200 passionate minds consisting of business and technical consultants, change makers as well as software developers, architects and cloud natives, we are driven to peak performance by our customers and their challenges. Together with customers from different industries, we build the bridge to the tech giant Microsoft. All with one goal: To create the best employee and customer experience in order to achieve competitive advantages.

Customers love our inspiring corporate culture, which is contagious. It successfully supports and overcomes organizational or technological challenges. Together with them, we shape the future of teams, products, companies and entire industries.
